The Revolutionary PVC Panels

SAPPHIRE

The Revolutionary PVC Panels

Strength, Style, Sapphire: The PVC Series You Can Trust!

The Sapphire Series is a Significant Step Forward in the PVC Industry. Launched for the first time in the year 2021 this was a breakthrough product in the PVC Segment. So, DELBY has worked towards its durability, mindful selection of designs and colours, sustainability & its affordability.

It is a compelling alternative to the traditional, local PVC options in the market which are weak & brittle. We at DELBY want that applying PVC Panels which is otherwise a convenient option, should not turn into a nuisance, That's why we came up with this REVOLUTIONARY Series - The SAPPHIRE Series, to address all the problems of local, unorganised, copied pvc products.

Experience DELBY'S unique experience in the segment of PVC Products panels with the Sapphire Series!
Design and Durability that lasts!!
